

TrenStar SA provides Customised and Scalable Asset management solutions to fit your operation. Our Management solutions can assist with Asset Tracking and Management through KPI Definition, Monitoring and Reporting

Fixed Asset Management

TrenStar's Fixed Asset Management (FAM) system is designed to bridge the service gap currently found between Tracking Software and ERP Software and is based on years of hands on experience with Asset Tracking and Management. The FAM system incorporates advanced mobile and tracking technology, including 2D Barcode and RFID, into its core and utilises Microsoft's BizTalk Server to allow interfacing to most ERP systems, thus resulting in a powerful and comprehensive system to allow corporations to maintain control over all their fixed assets.

TrenStar SA has regional offices in all major metropolitan areas:

Centurion (Head Office)	(012) 676-3300	Durban	(031) 461-5805
Wadeville	(012) 676-3300	East London	(043) 736-6338
Rossllyn	(012) 541-0032	Port Elizabeth	(041) 486-2540
Cape Town	(021) 931-1679		

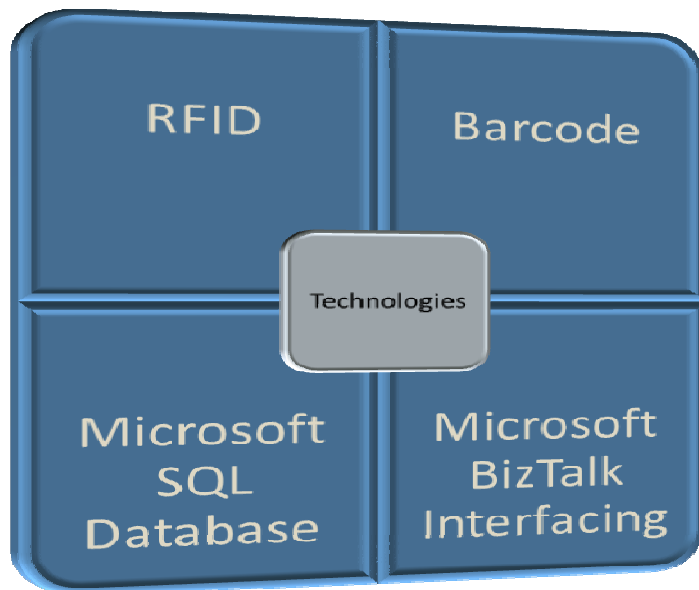

We track and manage your mobile assets so that you can focus on your business

Functionality Encapsulated

- Stock Takes can be completed quickly and accurately using Wireless and or 3G enabled Handheld scanners
- Assets can be located anywhere on the site through the use of RFID technology.
- Manage Assets issued to Rental Clients (Internal and External) and to Repair Service Providers.
- Track Asset movements throughout multiple sites and locations.
- Interfacing to your ERP system ensures that your Asset Register is always accurate, resulting in less unaccounted for assets on your Balance Sheet.
- Enhanced System Security ensures the validity of data and improves accountability.

Technologies Utilized

Reporting Provided

Fixed Asset Management system provides detailed Reports such as:

History Trace Reports

- Showing the detailed movement of the assets around the office.

Asset Register

- Listing all the Assets including the current location and asset type.

Stock Take Reports

- Displaying the detailed results of the last Stock take performed.

Asset Registrations and Terminations

- Listing all the new assets as well as the scrapped assets with the transaction dates, authorizing users and locations.

Repairs and Rental History Reports

- Showing the Issues and returns from Rental Clients and Repairs Service providers.
