

Base Dimensions	1280 x 1070mm
Height Overall	750mm
Internal (Bag Dimensions)	1210 x 1000 x 610mm
Volume Outside	1.03 m3
Volume Inside	0.74 m3
Volume Collapsed	0.27 m3
Inside Mass	38kg
Nett Gross Mass	475kg

The Omega Bin

TrenStar SA a distributor of the Omega Agri Bin in South Africa.

The product is designed to meet the agricultural industry's unique requirements, it's tough, durable and designed to protect produce, from orchard to market place.

This is a new generation bulk bin solution, for the harvesting of fruit and vegetables.

Manufactured from high tensile steel, hot dip galvanized to prevent corrosion and withstand almost any weather condition. The Omega bin is light weight, and with its fully collapsible design will reduce storage space and optimise return logistics. The outer bag is manufactured from reinforced woven polyester, coated in non-flammable and UV protected flexible PVC. The open weave construction allows for maximum air flow, and optimised post-harvest chemical application. The woven polyester is non-absorbent, allowing for easy cleaning.

The Omega Bin comes with the following features:

- ◆ Unique Identification, through barcode technologies and RFID enabled.
- ◆ Reduced Bruising, through increased contact surface and reduced hard surfaces.
- ◆ Increased airflow, allow better de-greening and cooling
- ◆ Non-absorbent materials, reduced cost on chemical usage.
- ◆ Easy cleaning, non-absorbent and scratch resistant material.
- ◆ 4-way entry, allow handing from any direction, and compatible with any pallet jack and/or forklift.
- ◆ Fully collapsible, 804 empty and collapsed units per open deck inter-link trailer.
- ◆ Stackable, up to 10 units high in ideal warehouse environments.

Through our barcode and RFID technologies, the Omega Bins can be used in conjunction with various TrenStar SA software applications, developed for the agricultural industry.
