

The Mesh Container

TrenStar SA offer a wide range of robust mesh sided containers in various sizes to meet the requirements of most, heavy duty, applications.

These mesh containers are extremely robust, manufactured from high tensile steel, and clad with flatex mesh. The chassis and frame construction is designed to accommodate load capacities of up to 1500 kg, which can be stacked up to 8 high in storage and up to 4 high in transit. (Depended on the container type). Hot dip galvanized to prevent corrosion and withstands almost any weather condition. The one piece fully collapsible design, allows the empty containers to be collapsed and stacked 2.4m high for optimised return logistics.

The mesh sided container range, all with the following features:

- ◆ Unique Identification, through barcode technologies and RFID enabled.
- ◆ One Piece Collapsible container, no lose components.
- ◆ Flatex Mesh provide additional security.
- ◆ Lockable lids and Front Drop Down Gate, for added security.
- ◆ Front Drop Down Gate provide easy access, loading and unloading
- ◆ High tensile chassis construction
- ◆ Relatively light weight construction.
- ◆ Corrugated Steel base, additional strength, increased load capacity.
- ◆ Full perimeter 4-Way entry base for easy pallet jack and forklift handling.

These versatile range of containers are used extensively in the Mining, Foundry, and Manufacturing Industries.
